**Background of Recipe Standard**

The Institute of Child Nutrition (ICN) was established in 1993 as a non-profit organization to promote and support research, training, and resource development in the field of child nutrition. The ICN's mission is to improve the health and well-being of children and adults through the development and dissemination of evidence-based resources and training materials.

The ICN's work is guided by its vision of a world where all children and adults are healthy, well-nourished, and able to reach their full potential. The ICN's resources and training materials are designed to be practical, accessible, and culturally appropriate, and are available in multiple languages and formats to meet the needs of diverse audiences.

The ICN's resources and training materials are developed in partnership with experts in the field of child nutrition, including researchers, practitioners, and community leaders. The ICN's resources and training materials are regularly updated to reflect the latest research and best practices in the field of child nutrition.

**ABOUT THE GUIDE**

This guide is a resource for practitioners and researchers who are involved in the development and dissemination of evidence-based resources and training materials in the field of child nutrition. The guide provides information on the background, purpose, and structure of the guide, as well as information on the resources and training materials available through the ICN.

The guide is organized into five main sections: **Background of Recipe Standard**, **Purpose of the Guide**, **Structure of the Guide**, **Resources and Training Materials**, and **Conclusion**. Each section provides information on the key concepts and findings related to the topic, and includes references to the relevant resources and training materials.

The guide is designed to be practical, accessible, and culturally appropriate, and is available in multiple languages and formats to meet the needs of diverse audiences. The guide is regularly updated to reflect the latest research and best practices in the field of child nutrition.
